Join The Fun In Story City, Iowa!

Iowa's only operating antique carousel will be whirling to the merry calliope tunes throughout the summer months. The restored merry-go-round is located in Story City's picturesque North Park along the Skunk River, and will transport you back in time as you take a leisurely ride.

One of a vanishing species, this fun machine was built in 1913 by the Herschell-Spillman Co. of Tonawanda, New York. It was originally owned by P.T. Gifford of Grundy Center, Iowa. Gifford traveled the Iowa countryside taking the carousel to county fairs and town celebrations, including Story City's Independence Day galas.

The splendid wooden figures are hand-carved from poplar and included 20 horses, two chickens, two pigs, two dogs, two chariots, and a whirling tub. Calliope tunes are generated by a 1936 Wurlitzer Military Band organ housed in the center of the carousel.

The carousel was purchased from Gifford in 1938 by the Story City Greater Community Congress, and proceeded to delight generations of children. Eventually, time and wear took their toll, and the battered steeds were forced into temporary retirement in 1977.

Operating Memorial Day Weekend through Labor Day Weekend

 Tourism Division
 P.O. Box 273, Story City

In 1980, interest in the old merry-go-round was resurrected, and restoration began at The Country Shop in rural Roland, Iowa. Layers of paint were removed, repairs made, and original colors of paint were mixed to match the old shades.

After one and one-half years, the original stencils, colors, and prints were completely restored to their present gleaming condition. A special structure was built to house the carousel, and June 4, 1982, a dedication was held.

This summer, come buy a bag of popcorn, climb aboard the carousel, and be a part of the magic that exists among the brass poles, revolving lights, and merry tunes.

Story City Museum

This quaint little brick building, obtained by the Story City Historical Society in 1985, once was a part of the water treatment system for our community.

The museum is designed to showcase the development, customs, artifacts and the heritage of our Scandinavian forefathers.

Our museum has excellent examples of textiles and vintage clothing, Story City memorabilia, hand tools, household items from the 1900s, books and paper collectibles and Scandinavian articles.

Open

Saturday: 1-5 pm
Sunday: 1-5 pm

From Memorial Day thru Labor Day

Energy Saving Tips For The Home

INSULATE

Whether you heat or cool your home, apartment or business with gas, oil, electric or other, you could save yourself 20% - 50% with a moderate investment in insulation or additional insulation. Many older homes do not have ceiling insulation and the addition of 6-inch batts or 8 inches of blown insulation could save 40% on heating costs. Your insulation needs will vary according to the climate of your area and the amount and kind of insulation you currently have. Consult a reputable insulation contractor or dealer for guidance. An investment in insulation today will pay for itself again and again in years to come.

WEATHERSTRIP

Test your windows and doors for drafts by moving a lighted candle around the frames. Any draft will cause the flame to dance. A minimal investment in caulking, weatherstripping materials and time could save up to 10% in energy usage.

In a colder area storm windows can be a good investment and should pay off their investment in five years or less. A less expensive solution would be to cover your windows in the winter with clear plastic. (Apartment renters can do this)

THERMOSTATS

Proper adjustment of the thermostat during both the heating and cooling seasons can account for large savings in energy costs.

In the winter a thermostat setting of 65° during the day with a night setting of 55° is recommended. If everyone in the family is going to be away for the day, remember to dial down for additional savings. For every one degree reduction of the average temperature of your home you can expect about a 3% savings of your energy costs. In winter the least expensive way to warm up is the use of warmer clothing.

A summer air conditioning thermostat setting of 78° is recommended.

You might want to consider an automatic setback thermostat to adjust your heating and cooling needs to your particular schedule. It can automatically turn the heat down when you are at work or asleep and automatically turn up the heat just before you get home or wake up. The automatic setback thermostat also can be adjusted to your summer cooling needs.

HEATING SAVINGS

In the early Fall don't turn the heat on until absolutely necessary; add an extra blanket to the bed instead.

In the day open drapery on the sunny side of the house and collect the free energy of the sun. Remember to close all drapery at night; heat escapes through glass 14 times faster than through walls.

Close off any unused rooms or close the registers in areas not used. Children should be instructed to avoid unnecessary opening of doors and to go in and out quickly to reduce heat loss. Garage doors left open also drain a house of valuable heat.

Keep the air flow to all registers, grills, outlets and baseboard heaters unimpeded. Clean or replace air filters regularly as it takes more electricity to pull air through a dirty filter.

COOLING SAVINGS

Overcooling and unnecessary cooling is expensive and wastes energy. Window fans, room fans or whole-house ventilating fans use about 1/10 as much wattage as a typical air conditioner. Use of these fans instead of the air conditioner except on all but the hottest days can save energy.

Drapery pulled on the sunny side of the house, awnings, overhangs, and trees can help reduce the heat build up in your house. On hot days try not to use your oven, the stove top, unnecessary lighting or the clothes dryer. If necessary to use these appliances, schedule their use at night when it is cooler.

Again, clean filters and unobstructed vents will help reduce air conditioning energy costs.

WATER HEATING

Many water heater thermostats are turned up too high. Turning the water heater down from 150° to 140° can save 6%. Also insulate your water tank to keep the heat in.

Repair leaky faucets (especially hot water) and use low-flow shower heads to cut hot water use and save energy.

Take showers whenever possible instead of baths since the average shower uses about half the amount of water as a bath.

Lastly, consider a solar water heater if the need arises to replace your unit. Depending on your climate, and unit purchased, a solar water heater can return its investment in only a few years.

KITCHEN ENERGY SAVINGS

Don't cook food or boil water in an open pan if you can avoid it. Match the pan size to the burner so less heat will be lost to the air.

When using your oven, try to cook several dishes at once. Don't peek unnecessarily in the oven and release valuable heat.

A microwave oven is an energy saver because it cooks food in a much shorter time. It also does not release as much heat to the kitchen as a standard oven. (Important in the air conditioning season)

The average dishwasher uses 14 gallons of hot water per load and a lot of electricity to dry the dishes. Make sure that every load is a full load and consider letting your dishes air dry after a load by opening the door a little.

Obviously, holding your refrigerator or freezer door open can waste a lot of energy. Decide what you want from the refrigerator or freezer first and then open the door to look for the item. Before buying a new refrigerator or freezer, check the comparative energy usage figures with the dealer and select the most energy efficient unit.

LAUNDRY SAVINGS

Inefficient laundry habits can waste a lot of energy. Make sure your washer and dryer always have full loads before running. Use the cold cycle of your washer as often as possible. Vent your dryer to the outside in the summer to get the warm moist air out of the house, but in the winter you can vent this air to the inside for added heat and humidity for your home.

REMEMBER ENERGY SAVED = \$\$\$ SAVED

WHY ANOTHER DIRECTORY?

Old Heritage, a Market Area Publisher, produces area wide telephone directories as a convenience for the community. Included in our phone books are complete white and yellow page listings of the home and office numbers you need from your area, not just those numbers serviced by a phone utility company.

If You Have Questions

Call:

314-394-0811

The area wide book also offers community interest pages, zip code information & money saving coupons.

Next time you need a telephone directory, pick up your area wide book. We offer you more.

OLD HERITAGE ADVERTISING & PUBLISHERS, INC.
14535 Manchester Rd., P.O. Box 60
Ballwin, Missouri 63022

ANIMAL BITES

If possible to do so without endangering other people, the animal should be caught and kept until it is tested for rabies or other diseases. Call Humane Society.

1. Do not try to stop bleeding from non-major animal bites. Bleeding will clean out the wound.
2. Wash wound thoroughly with mild soapy solution.
3. Cover wound with sterile dressing.
4. Keep person calm and warm.
5. Call a doctor. Animal bites are dangerous and should be checked by a physician.

BLEEDING

In severe cases it is essential to stop the bleeding first, then get medical assistance.

The 3 First Aid methods for stopping bleeding are:

DIRECT PRESSURE PRESSURE POINTS TOURNIQUET

1. In the direct pressure method, pressure is applied directly on the wound itself; use a sterile cloth if possible. This method will usually control the flow of blood; always consider this method first. If severe bleeding continues, it will be necessary to use the pressure point or tourniquet method.
2. The pressure point method is used to stop arterial bleeding (blood bright red spurting) from arms or legs. In this method, pressure is applied to the artery supplying the blood. For bleeding from the arm the pressure point is mid-way between the armpit and elbow on the inner arm. For the leg the pressure point is just below the groin on the front inner half of the thigh. With severe arterial bleeding, it is important that you locate the pressure point within seconds. Therefore, practice locating the pressure points so that you will find them instantly in an emergency. If severe bleeding cannot be stopped quickly by direct pressure or the pressure point method, a tourniquet must be used.
3. The tourniquet method is used to stop the flow of blood to and from the limb by tying a band as close to the wound as possible between the wound and the heart. Improperly used, a tourniquet can cause loss of limb or aggravate shock. However, when severe bleeding from an arm or leg cannot be stopped within seconds by the preferred methods, a tourniquet must be used to save a life.

BURNS

1st Degree Burn (Skin Red and Tender)

1. Flush with cold water.
2. Cover burn with gauze or dry sterile dressing.

BURNS CONT

2nd Degree Burn (Skin Red, Tender, and Blistering)

1. Immerse in cold water (NOT ice water) for 1-2 hours.
2. Call a doctor.
3. Gently blot dry. Do not break blisters, use grease or antiseptic.
4. Cover with dry sterile dressing.

3rd Degree Burn (Skin Burned or Charred)

1. Call a doctor.
2. Do not remove adhered particle(s) of charred clothing.
3. Cover with thick sterile dressing, freshly ironed or laundered sheets or linen.
4. Elevate burned area.
5. Seek medical assistance immediately.

CHOKING

People who choke on food usually cannot speak or breathe. If person is coughing, let him cough out object.

Do not slap someone on the back at first signs of choking. Only if a person cannot clear the airway must you help.

BACK BLOWS

A rapid series of sharp blows delivered with the hand over the spine and between the shoulder blades. (Small child can be held upside down.)

MANUAL THRUSTS

A series of thrusts to the upper abdomen or chest to force air from the lungs.

1. Stand behind the victim.
2. Reach around bear-hug style with your hand across the abdomen, between the navel and the rib cage.
3. Pull toward you in a quick upward thrust (repeat if necessary).

It might be necessary to remove the foreign object with your fingers. Be cautious not to push the object farther down the throat.

DROWNING

If the person is unconscious, you must administer artificial respiration and call for immediate medical assistance.

1. Administer artificial respiration by mouth to mouth or by the back pressure arm lift method.
2. Turn victim's head to one side to prevent vomit from entering lungs.
3. Keep victim warm and comfortable.
4. Seek medical assistance immediately.

FAINTING

Fainting is a partial or complete loss of consciousness due to temporary insufficiency of blood supply to the brain. Fainting might constitute a brief episode in the development of a serious medical problem; call your physician.

SYMPTOMS

Complaints of weakness, dizziness, or spots before the eyes, pale or sweaty appearance.

1. Place victim on his back with head lower than his feet.
2. Loosen clothing and cover with blanket if necessary.

FAINTING CONT

3. Use a cold compress on victim's face or ammonia inhalant to revive.
4. Have victim rest at least 15 minutes. Do not give liquids or food.

FRACTURES & BROKEN BONES

Warning * Persons with neck and back injuries should not be moved by anyone except trained medical personnel, except in life threatening situations. Request medical assistance immediately.

In the case of an open fracture, stop the bleeding first and cover the wound with a sterile dressing.

1. Allow victim to place break in comfortable position.
2. Apply splint to immobilize the limb.
3. Place victim on his back and cover with blanket if necessary.

HEART ATTACKS

When the first signs of an attack appear, immediately call ambulance or get the victim to an emergency hospital. If this is not possible, call for medical assistance.

Warning * Call a physician even if the victim thinks he will feel better in a few minutes.

SYMPTOMS

Pain in the upper abdomen, chest, possibly extending into the arms or neck. Shortness of breath, nausea, vomiting, and sweating.

1. Place victim in comfortable reclining position.
2. Loosen clothing.
3. Keep victim calm and cover with blanket if necessary.
4. If victim stops breathing, apply artificial respiration.
5. If victim loses consciousness, his heart may have stopped...Apply CPR. To learn CPR (Cardiopulmonary resuscitation) call your local Heart Association or Red Cross.

HEAT STROKE

Heat stroke is characterized by high body temperature, hot, flushed skin, rapid but weak pulse and possible unconsciousness.

Remove the victim from the source of heat immediately, into a cool area. Seek help at the nearest emergency room. While enroute to the emergency room, victim will benefit from being sponged on side of neck, armpits, sides of chest and on inner thighs with cool water.

Heat exhaustion, characterized by pale and clammy skin, nausea, headache and weakness, may be treated with sips of salt water. Bring patient to an emergency room.

Heat cramps are characterized by spasms in the legs and abdomen. Place patient in cool area and gently massage the affected areas. Take two salt tablets every 15 minutes, if available. If salt tablets are not available, mix 1/4 tsp. salt in one glass water and sip. Seek the advice of your family physician, or go directly to an emergency room.

INSECT BITES & STINGS

Most insect bites are not serious unless there is an allergic reaction. If there is doubt about what kind of insect has bitten you, call a doctor. If possible, catch the insect in a bottle for identification.

1. Remove stinger if still in skin.
2. Apply ice to area of bite.
3. Apply a thick paste of baking soda and water to area of bite.

BLACK WIDOW and BROWN RECLUSE bites are rarely fatal to adults, but the victim should receive medical attention.

SYMPTOMS

Victim may experience a swelling, redness and burning pain in the area, as well as stomach pain, severe headache, cramps, rash, or profuse sweating.

1. Treat as above.
2. Give aspirin for pain. Call a doctor.

POISON IVY & OAK

Skin may become red and swollen, small blisters may appear on the skin, which may become large after several hours. Victim may have violent itching.

If victim develops a large rash, get medical help. Do not let him scratch.

1. Wash area thoroughly with soapy solution.
2. Swab with rubbing alcohol.
3. Apply calamine lotion. For large rash, bathe in solution of one cup baking soda in a bathtub of water.

SHOCK

Shock is characterized by pale, cold skin, a rapid but weak pulse, nausea or severe thirst. In later stages, the victim becomes unresponsive and pupils dilated.

Give necessary first aid to eliminate the causes of shock, such as excessive bleeding or stoppage of breathing. Have victim lie flat and cover him with a light blanket only to maintain body heat. Check to ensure open airway, and if patient is vomiting, tilt head to side. For victims of head injuries, keep head higher than rest of body. Other shock victims benefit from having feet raised from 8 to 12 inches above the head.

Call for ambulance immediately.

UNCONSCIOUSNESS

1. Apply artificial respiration if breathing has stopped.
2. Turn victim's head to one side if possible.
3. Place victim on his back with his head lower than his feet.
4. Cover with blanket if necessary.
5. Call a doctor.

EMERGENCY ANTIDOTES

IN CASE OF POISONING, KEEP CALM AND CALL:

A Doctor, Poison Control Center Or Emergency Room At Once

Then using the table below, give **FIRST AID** at once.

If no antidotes are available, give large amounts of water (Unless victim is unconscious). Keep patient warm and do not induce vomiting without specific instructions to do so! Do not cause vomiting in cases of Acid or Alkali poisoning. A sample of the substance ingested should be brought

to the hospital, in the container in which it was packaged. If possible, try to record the time of ingestion and the amount ingested. If the patient has vomited, save a sample of the vomited material.

Act fast in a poison emergency!

POISON: Medicines, Headache tablets, Polishes, Paints, Cleaners, Thinners, Insecticides, Weed killers

1 CALL NEAREST
POISON CONTROL
CENTER
No. _____

2 If you can not get instructions quickly:
CALL LOCAL AMBULANCE SERVICE or
TAKE PATIENT TO NEAREST EMERGENCY ROOM
Hospital phone _____

3 DON'T CAUSE VOMITING IF PATIENT:
A. Is unconscious or in coma.
B. Is having convulsions.
C. Has swallowed a corrosive substance that
burns mouth or throat (Toilet Bowl
Cleaners, Lye, Ammonia, Bleach).
D. Has swallowed a petroleum product (Kerosene,
Lighter Fluid, Paint Thinner, Furniture Polish).

REMEMBER

PREVENTION IS THE BEST TREATMENT, HERE'S HOW:

Keep all poisons in their own identifiable container. Never give or take medicine in the dark.
Store all poisons and medicines high up and locked up. Check all medicines periodically and throw leftovers down the toilet.

KEEP ALL MEDICATION AWAY FROM CHILDREN

BE PREPARED TO SAVE A LIFE

Place nonbreathing victim on back, face up.

Clean out any foreign matter by turning victim's head to side, force mouth open and wipe out throat and mouth with finger or cloth.

MOUTH TO MOUTH METHOD IN ADULTS:

Insert thumb of your left hand between victim's teeth. Hold the jaw upward so that the head is tilted backward. Close victim's nostrils with your right hand. Take a deep breath and place your mouth tightly over victim's mouth and your own thumb. Blow forcefully enough to make victim's chest rise. Repeat inflations every five seconds.

MOUTH TO MOUTH METHOD IN CHILDREN:

(Or in adults with tight jaw.)

Grasp the angles of the child's jaw at the earlobes with both hands, and lift up forcibly so that the head is tilted backward. Push child's lower lip toward the chin with your thumbs. **NEVER LET THE CHIN SAG.** Take a breath and place your mouth tightly over child's mouth (For small child cover both mouth and nose). Blow in gently until his chest moves, then take your mouth off and let him exhale passively. Repeat inflations about one every three seconds. **FOR INFANTS USE PUFFS.**

For further **FIRST AID** INFORMATION AND TRAINING CONTACT YOUR LOCAL **American Red Cross.**

Having trouble finding a phone number?

The following tips will make it easier for you to locate numbers in the white pages of this directory:

- **Last Names** appear once followed alphabetically by individuals with the same last name; the last name is not repeated.

CAMPBELL B L 401 S Coulter
Bernice & Arthur Rt 4
C E 410 W Monroe
Carl 528 S Morris
Charles R RR 1
Cloyd J Rt 5
Danny RR 2 Auxvasse
David H Rt 5

- **Abbreviations** appear as if they were spelled out: "St. Louis", look under "Saint Louis".
- **Ampersands & Hyphens** are disregarded. Look up a listing as if it were separate words: "Decatur Machine Shop, Decatur-Macon County Co-op, Decatur Manor Inc."
- **Apostrophes** are disregarded. If you want a listing for "Joe's Restaurant", look for it as "Joes Restaurant". If you think you are looking for "Smith's Implement Inc" also look for "Smith Implement Inc."
- **Government** listings - Look up government agencies under the city or county name. Federal agencies are listed under "United States".
- **Initials** precede first names: "Smith A" precedes "Smith Albert."
- **Letters in names** precede the beginning of that particular alpha section. "A-1 Auto Body" precedes "Abbott, Bob".
- **Numbers** are sequenced as if they were spelled out: "1st National Bank", look under "First National Bank".
- **Prefixes** - A name with a prefix is considered to be one word: "McDonald" follows "Mayer".
- **Spelling** of a name can vary: "Kauffman", "Kaufman", "Kaufmann"; look up all variations.
- **"The"** usually comes last: "The First State Bank" would be listed as "First State Bank, The".

Save time and money by looking up numbers instead of calling directory assistance.

DIRECTORY ASSISTANCE

- To call Directory Assistance for numbers within your market service area dial "1411"
- To call Directory Assistance for numbers from other communities with your area code dial "1 + 555-1212."
- To call Directory Assistance for numbers outside of your area code dial "1 + Area Code + 555-1212".
- To call Directory Assistance for "800 service" numbers dial "1 + 800 + 555-1212".

There may be a charge for calls to Directory Assistance. Telephone company rules in regard to the number of free calls and the charge for calls made above that number may vary.

Ways to Save on Directory Assistance Charges

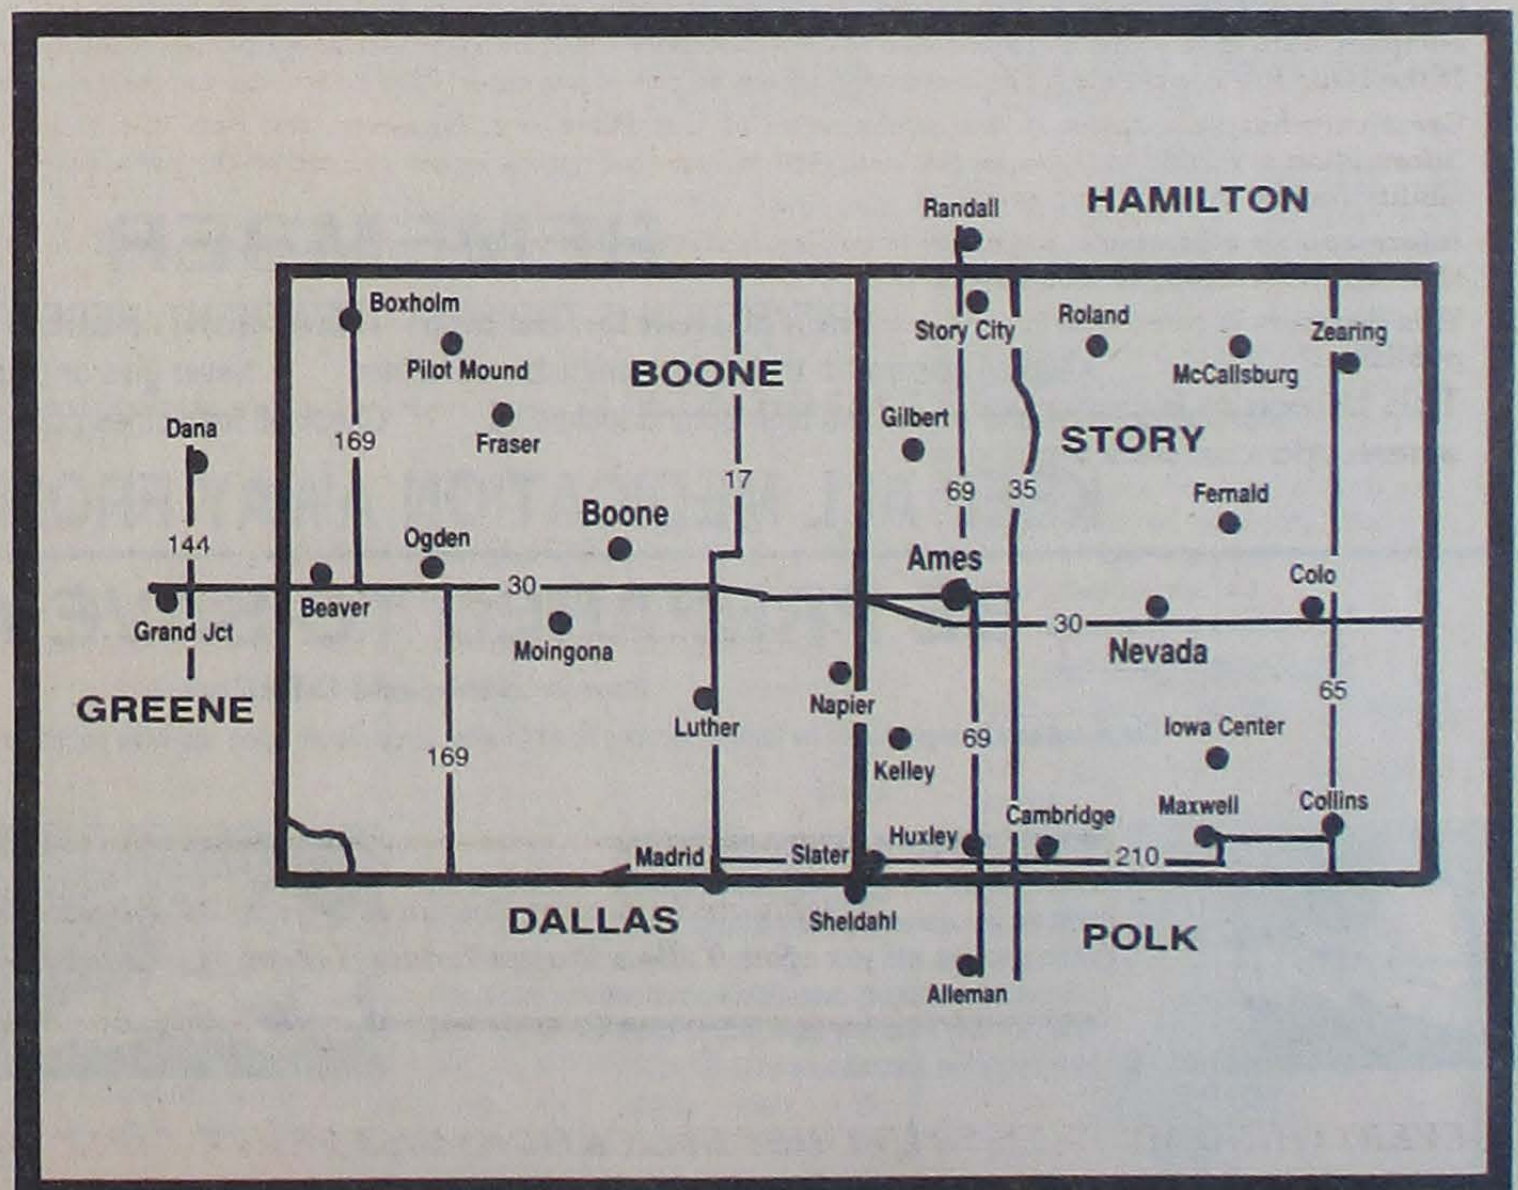

Because this is an "Area Wide" directory it contains more information covering a greater area than your local telephone company supplied directory. By using this directory you should find most of the numbers of friends and neighbors as well as businesses serving your area.

Other Ways To Save on Directory Assistance:

- A new number reference is usually provided for someone who has recently moved. Call the old number and you should get a recorded message with the new number.
- If you need two numbers, ask for both at the same time. Directory Assistance will usually provide, at no charge, a second number.
- You can help the Directory Assistance operator as well, possibly saving a second call if you can provide specific information on the person you need the number for.

This Telephone Directory contains complete white page residential listings and yellow page business listings for the area shown in the map below.

Please refer to the next page for specific town, prefix and area code information for this area.

Not Valid with any other offer or promotions.

100% ACCURACY

It takes time and effort to compile white and yellow page listing information, print and distribute this directory. Within that time some phone numbers in this directory have changed due to people and businesses moving in or out of the area and within the area. This is why it is impossible for any telephone directory to be 100% accurate at the time of distribution.

However, the best way for us to find these changes is for you to report them. If you live in the directory coverage area and have moved or changed phone numbers, Old Heritage would like to know.

Please fill out the form on back and mail in.

Thank You

START YOUR EXECUTIVE TRAINING NOW

Why wait until you graduate from college to start a management training program? If you have at least two years remaining in school, consider Air Force ROTC. You'll develop your managerial and leadership abilities in the Air Force ROTC. We'll prepare you for a challenging future as an Air Force officer, and give you \$100 tax free each academic month to help you with college expenses. When you graduate, you'll have a responsible person with outstanding opportunities. It all depends on you. There's excellent pay and benefits, too. Talk to your local Air Force ROTC representative today. Why wait? We can open the door NOW to start a fast-paced career.

AIR FORCE ROTC

LEADERSHIP EXCELLENCE STARTS HERE

AREA WIDE

yellow pages

**There is
only**

**ONE
WAY**
→

**to have
a better
phone book...**

The one way to make sure you use the best phone book is by using the one with the total calling coverage. This phone directory has complete white and yellow pages information for 31 communities in the Ames area. It encompasses all or parts of 7 different phone company books.

Your new area wide book eliminates the need for a stack of directories and may reduce how much you spend on directory assistance calls.

Businesspeople appreciate using one ad to reach a larger number of potential customers. They like the increased exposure and the extra calling information.

These features combined with area and zip code information and community interest pages make the Ames Area Wide phone book a master source of information.

the sensible choice
